PaySuite®

Welcome to the Future of Payment Solutions

"The way we pay is changing dramatically, and Android changes everything."

It opens the door to a vast array of global value-added applications that can now be available locally, it significantly reduces the cost of terminal development, but most importantly, it means POS and Payment can coexist on the same platform."

Andre van Duiven, Head of Payments at
Sektor

PaySuite® FLEX

Introducing PaySuite® FLEX: as the name suggests, an adaptable and flexible cutting-edge software solution revolutionising card present payment acceptance on Android NFC enabled devices. Whether it's POS terminals, Kiosks, Tablets, or other Mobility devices, the PaySuite® FLEX application means they can accept contactless card payments.

Gone are the days of needing separate payment hardware; PaySuite® FLEX integrates Point Of Sale (POS) to accept payments on a single device, enhancing a seamless in-store checkout experience. Embrace PaySuite® FLEX to streamline your payment process, boost sales, and elevate your customer experience to new heights.

WHAT IS PAYSUITE FLEX?

**JUST AN APP. YOU CAN
JUST DOWNLOAD IT**

**VIRTUAL EFTPOS TERMINAL
ON ANDROID**

**NO SPECIALISED PAYMENT
TERMINAL HARDWARE**

NFC (CONTACTLESS) ONLY

TRANSFORM YOUR BUSINESS WITH PAYSUITE® FLEX

Use PaySuite® FLEX to innovate your customer experience and staff journey. Mobilise store staff to provide superior customer service by accepting payments on the shop floor. Empower road warriors and delivery drivers to accept payments in the field. Or add additional points of acceptance anywhere through Android NFC enabled digital displays and kiosks.

THIRD-PARTY APP INTEGRATION

PaySuite® FLEX effortlessly integrates with third-party applications, eliminating friction in customer interactions. Seamlessly integrate your POS and marketing apps, and embed loyalty and donation programs to deliver a unified experience.

NO ADDITIONAL HARDWARE REQUIRED

With PaySuite® FLEX, businesses can accept contactless payments directly on Android NFC enabled POS terminals, kiosks, tablets, and other mobility devices, reducing costs and simplifying operations.

CHANGE HOW YOU GET PAID

On the road, in-store, or at events, PaySuite® FLEX provides unparalleled flexibility and can transform thousands of devices to become additional points of acceptance without the need of a separate payment device.

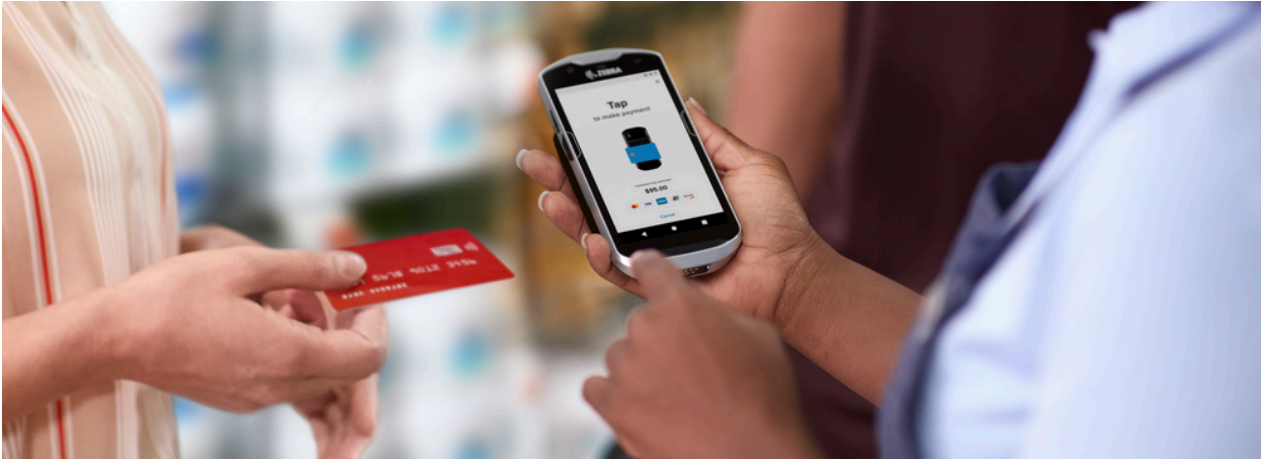

ENABLE PAYMENTS IN MORE PLACES

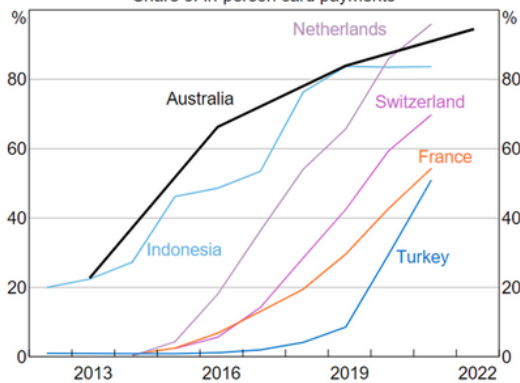

Extend payment capabilities to mobility solutions, unlocking new revenue streams and reaching customers in previously untapped environments. PaySuite® FLEX opens doors to fresh opportunities and helps drive sales.

WHY PAYSUITE FLEX?

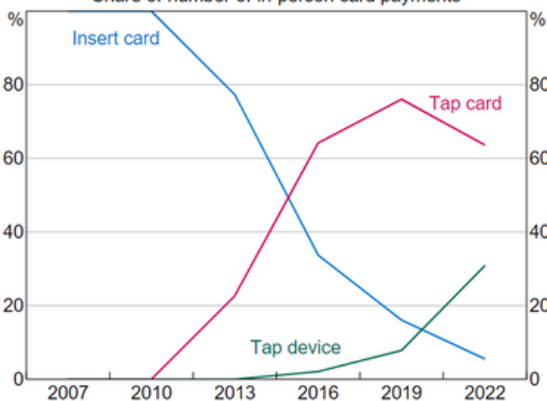

Contactless Card Payments

CONTACTLESS PAYMENTS

Contactless payments have witnessed exponential growth, with the global market projected to reach USD\$123 billion by 2030.

Android handheld device providers are gearing up to enhance millions of existing Consumer Off The Shelf (COTS) devices, offering seamless integration with contactless payment technology via device and card.

Our NFC Tap on Android device Softpos application PaySuite® FLEX, revolutionises the mPOS landscape, allowing merchants to accept card present payments without the need for additional hardware.

UNLOCK ENDLESS POSSIBILITIES

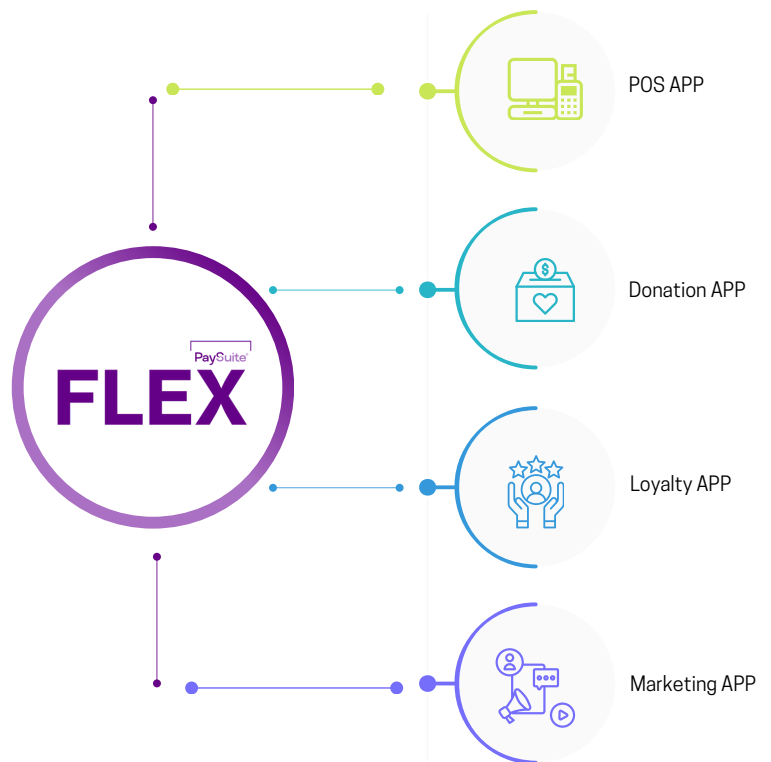

Integrate your software with PaySuite® FLEX to seamlessly accept payments and reduce friction in customer interactions. Effortlessly connect your Point of Sale (POS) software and marketing apps, or embed loyalty and donation programs for a unified experience.

Seamless Integration with POS and Marketing Apps

Streamline the in-store checkout experience and accept payments through a single solution. Or Synchronise promotional activities and enable real-time analytics for effective marketing strategies.

Embedding Loyalty and Donation Programs

Embed customer rewards and charitable giving options directly into your payment process with PaySuite® FLEX. Enhance customer satisfaction and community engagement within a unified payments flow.

PaySuite

DEVICES

We are dedicated to simplifying and enhancing the payment experience for businesses of all sizes. Our innovative range of PaySuite® DEVICES offers unparalleled flexibility, reliability, and security, enabling merchants to streamline their operations and provide a seamless payment experience for their customers.

Our FLEX devices empower businesses to accept payments seamlessly across POS systems, kiosks, tablets, and mobile platforms. While SoftPOS can operate on any Android GMS certified device, PaySuite® accredits specific devices to ensure optimal performance and reliability. This accreditation process guarantees that our FLEX Devices meet stringent standards, delivering a secure and convenient payment solution tailored to modern business needs.

Select from a range of endorsed hardware choices offered by industry-leading manufacturers:

SECURITY AND COMPLIANCE

At PaySuite® FLEX, security and compliance are paramount. Our isolated payments Software Development Kit (SDK), approved by Visa, Mastercard, and American Express. PaySuite® FLEX is also PCI MPOC approved for both SDK and attestation ensuring security & compliance requirements are met.

Every transaction is safeguarded from the moment card data is read, encrypted instantly with a unique key and remains encrypted until payment processing begins within our partners' PCI DSS-compliant environment. PIN data is isolated from card data where a different encrypting key is used with a unique key for every transaction, further enhancing security. PIN data is translated within a hosted payments HSM, PCI HSM approved, and managed by a PCI PIN-certified partner, ensuring it remains uncompromised.

DATA SECURITY

Our commitment to security extends to the handling of non-payment data. Processed independently using separate encryption keys and different hosted services, non-payment data remains isolated from payment data. This strategic separation allows us to continuously refine and innovate our products without compromising compliance and security. This approach not only enhances our solution's robustness but also ensures that our partners benefit from the latest advancements without any security risks.

PaySuite® FLEX is designed to seamlessly integrate with third-party software, allowing partners to initiate payments effortlessly. By handling compliance and security, PaySuite® FLEX ensures that no payment card data is transmitted through or stored within the third-party software, freeing them from these burdens and allowing them to focus on innovating and delivering a unified experience.

PARTNERSHIP

Are you an ISV or software developer seeking to enhance your offerings? Join us as a PaySuite Developer and unlock the full potential of our advanced POS and Payment solutions.

By registering your interest, you'll gain access to:

- ✓ Expert consultations from our dedicated payments team.
- ✓ Exclusive understanding of how you can enhance your Software to add payment features.
- ✓ Technical Support: Provide access to APIs, SDKs, and technical resources to help you integrate your software with PaySuite.
- ✓ Sales Enablement: Providing sales training, access to sales teams or channels, and assistance in selling PaySuite solutions.
- ✓ Certification: Become a certified PaySuite ISV and Developer to ensure compatibility, security, and reliability.

Don't miss out on industry insights, networking opportunities, and exclusive events tailored for our partners. Let's collaborate to take your software solutions to new heights with PaySuite!

Take the next step and register your interest today to become a PaySuite Developer.
